

Superior Quality Laminated Folded Hand Towel

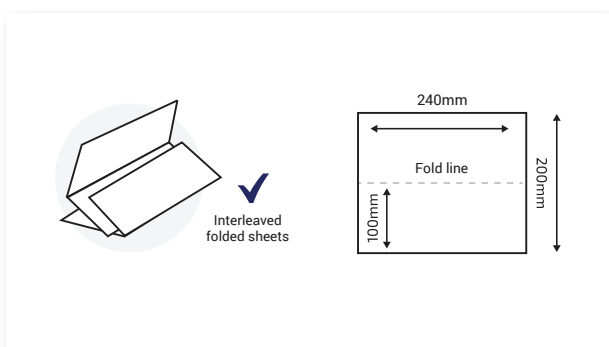

*SuperTowel Folded Hand Towels are softer, stronger,
and more absorbent than usual paper towels.*

*The Interfolded towel design helps to prevent towels from ripping when pulled from the dispenser,
and ensures that only single sheets are dispensed at a time, reducing usage and wastage.*

The lamination technology used on the SuperTowel ensures that each sheet is absorbent and strong, even when wet, preventing it from becoming soggy or ripping.

SuperTowel offers the best in consistency and affordable pricing, *therefore making it one of the leading folded towels on the market.*
